

Chemical

Since 1979 our craftsmen have successfully performed maintenance and erected capital projects at chemical facilities in Northwest Indiana and Northeast Illinois. Our Project Managers and supervision assist the owner on the front end of the project to determine budgets and best practices. We help integrate the new construction activity into the owner's current production system.

Utilizing the Nooter Management System gives us the ability to meet the client's needs safely, on time and on budget. We involve our Project Managers, Estimators and Supervision every step of the way to ensure all client goals are attained and exceeded. Our best source of business is referrals from happy clients.

Safety is our number one concern. Each project is carefully scrutinized to make sure we adhere to the highest possible standards for health safety and protection of all personnel, both yours and ours, at each worksite.

Call us today so we can talk about how we can help you!
